

ANNUAL INSPECTION PROCEDURE

SYSTEM X TOPCOAT

System X Topcoat is designed to make warranted coating annual inspections simple, quick, and cost effective for both installers and consumers. Topcoat is available in a 35ml bottle kit box that supplies enough coating for even large SUVs and trucks. This is possible due to Topcoat's unique formulation that allows the coating to easily spread and provides ample working time. Additionally, Topcoat is formulated to reach a full cure faster than our traditional coatings, which allows better turnaround time and customer convenience.

PRICING

Because Topcoat is an annual maintenance product, it's important that it be economical to the end customer. On average, System X installers charge \$200-\$300 for application.

APPLICATION

Unlike traditional coatings, Topcoat requires very minimal prep. Because the vehicle is already coated, the installer in many cases will only need to wash and decontaminate the vehicle. *Prep with PH neutral soap.

Once prepped, Topcoat applies like any other coating. Working a 3'X3' area, apply Topcoat in a cross-hatch pattern and immediately buff it off using the 3-towel method. Topcoat will not flash like traditional coatings but will remain workable for a minimum of 20-30 seconds.

Total application time including a quick wash/decon, should take approximately 45-60 minutes (if no correction needed).

EFFECTIVENESS	Annual maintenance coat
BOTTLE SIZE	35mL
SHELF TIME	18 months unopened and stored dry at 13°C to 29°C
APPEARANCE	Clear / High Gloss
FILM THICKNESS	Up to 0.2 mil
CHEM. RESISTANCE	Very Good
TEMP. RESISTANCE	> 538°C (1000°F)
ADHESION CROSS-CUT TAPE	(ASTM D3359) 5B (0%, none)
COVERAGE	200 sq feet (18.6m2) per 100mL
DRY TIME	20 minutes
CURE TIME	Initial cure in 3 hours, full cure in 1 day
